

Safety Data Sheet – Hawkeye Surface Sanitiser

1. IDENTIFICATION

Product Name: Hawkeye Surface Sanitiser
Other Names: RF-065
Recommended Use: Sanitiser
Manufacturer Address: 4 Swans Rd, Bell Block
Telephone: 06 9273025
Emergency Phone: 027 3264539
National Poisons Centre: 0800 764 766

2. POSSIBLE HAZARDS

Hazard Classification: 6.3B,
Causes mild skin irritation. Skin corrosion/irritation category 3

3. COMPOSITION: Information on Ingredients

Ingredient	CAS Number	Concentration (%w/w)
Hydrogen Peroxide	7722-84-1	0.5
Peracetic acid	79-21-0	0.02 – 0.06
Balance – Proprietary ingredients of low hazard	Proprietary	To 100%

4. FIRST AID MEASURES

Consult the National Poisons Information Centre 0800 POISON (0800 764 766) or a doctor in every case of suspected chemical poisoning. Never give fluids or induce vomiting if a patient is unconscious or convulsing regardless of cause of injury. If breathing difficulties occur seek medical attention immediately.

Swallowed

If swallowed, do not induce vomiting. Drink a few cupful's of water or milk. Begin artificial respiration if the victim is not breathing.

Skin Contact

Remove contaminated clothing and shoes and wash skin with plenty of soap and water. DO NOT scrub the skin. Wash clothing before reuse. Seek medical attention if symptoms occur.

Eye Contact

Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Remove contact lenses if present and easy to do and continue rinsing. Do NOT allow victim to rub eyes or keep eyes closed. Obtain medical attention if symptoms occur.

Inhalation

Move the victim to fresh air immediately. Begin artificial respiration if breathing has stopped. Obtain medical attention if symptoms occur.

Medical Attention

Treat symptomatically and supportively. No known antidote. In all cases consult the National Poisons Centre for the most up to date treatment information.

5. FIRE FIGHTING MEASURES

Shut off product that may 'fuel' a fire if safe to do so. Allow trained personnel to attend a fire in progress, providing fire fighters with this Safety Data Sheet. Prevent extinguishing media from escaping to drains and waterways.

Suitable extinguishing media

Not combustible, however, if material is involved in a fire use: Fine water spray, normal foam, dry agent (carbon dioxide, dry chemical powder). Cool fire exposed container with water spray.

Hazards from combustion products

Oxidizing substance. Non combustible, but will support combustion of other materials.

Precautions for fire fighters and special protective equipment

Not combustible, however following evaporation of the water component of the material, the residual material can

Safety Data Sheet – Hawkeye Surface Sanitiser

burn if ignited. On burning will emit toxic fumes, including those of oxygen. Fire fighters to wear self-contained breathing apparatus and suitable protective clothing if risk of exposure to vapour or products of combustion. Heating can cause expansion or decomposition of the material, which can lead to the containers exploding. If safe to do so, remove containers from the path of fire. Keep containers cool with water spray.

Hazchem Code

None

Flash Point

>100 °C

6. ACCIDENTAL RELEASE MEASURES

Emergency Procedures

Prevent product from escaping to drains and waterways. Contain leaking packaging in a containment vessel or bunded area. Ensure that drain valves are closed at all times. Clean up minor spills immediately.

Methods and materials for containment for a major spill

Eliminate sources of ignition. Warn occupants of downwind areas of possible hazards. Keep the public away from the area. Prevent product from entering sewers, watercourses, or low-lying areas. Shut off the source of the spill if safe to do so. Advise relevant authorities if substance has entered a watercourse or sewer or has contaminated soil or vegetation. Take measures to minimise the effect on the groundwater. Collect and seal in properly labelled containers for disposal. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations. In all instances due consideration must be given for First Aid Measures (Section 4), PPE requirements (Section 8), Stability and Reactivity (Section 10) for this material.

7. HANDLING AND STORAGE

Precautions for safe handling

Keep out of reach of children. Keep containers closed. Use only in well-ventilated areas. When handling do not eat, drink or smoke. Wash hands after handling.

Conditions for safe storage

Store in a cool, dry place away from direct sunlight and incompatible materials. Keep away from heat and ignition sources. Store in original containers. Protect from physical damage to prevent accidental release.

Incompatible materials

Strong acids, alkalis, reducing agents, combustible materials, organic chemicals, metal salts, and permanganates.

Fire Extinguisher Requirements

No specific requirements.

8. EXPOSURE CONTROLS: Personal Protection

Exposure Limits

Peracetic acid: STEL = 0.4 ppm (ACGIH 2015)

Acetic acid: WES-TWA 10 ppm, 25 mg/m³; WES-STEL 15 ppm, 37 mg/m³

Hydrogen peroxide: WES-TWA 1 ppm, 1.4 mg/m³

Engineering Controls:

The use of local exhaust ventilation is recommended to control process emissions near the source if using bulk quantities. Sufficient ventilation should be provided to keep the solvent in air concentrations below any relevant exposure limit. Provide mechanical ventilation of confined spaces.

Hygiene Controls:

Facilities storing or utilising this material should be equipped with a facility for washing hands/face after work.

Personal Protective Equipment

Respiratory Protection: Recommended if applying large quantities of product.

Eye protection: Recommended if applying large quantities of product.

Skin/ Body Protection: It is recommended that long sleeves and pants are worn when using and chemical resistant gloves (eg nitrile, latex) be worn when applying large quantities of product.

Safety Data Sheet – Hawkeye Surface Sanitiser

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Clear liquid
Boiling Point (°C):	Approximately 100
Melting Point(°C):	Not applicable
Flash Point(°C):	>100
Lower Explosive Limit, LEL (%):	No data available
Upper Explosive Limit, UEL (%):	No data available
SG/ Density, 20 °C (g/mL):	0.95 – 1.05
Vapour Pressure, 20 °C (kPa):	No data available
Alkalinity/ acidity as pH:	3.5 – 5.5
Solubility in water:	Miscible

The values listed are indicative of this product's physical and chemical properties. For a full product specification, please consult Key Industries.

10. STABILITY AND REACTIVITY

Chemical stability

Stable at room temperature and pressure. Reacts with metals.

Hazardous decomposition products

Supports combustion of other materials and increases intensity of a fire. Potential for exothermic hazard..

Specific Materials to Avoid

Strong acids, alkalis, reducing agents, combustible materials, organic chemicals, metal salts, permanganates and heat.

Hazardous Polymerisation

Not known to occur.

11. TOXICOLOGICAL INFORMATION

Acute Effects

Ingestion: Low toxicity if swallowed. Exposure to large quantities may result in such nonspecific symptoms as headache, dizziness, weakness, and nausea.

Ingestion of small amounts is unlikely to cause permanent injury.

Eye Contact: The liquid may cause transient eye irritation. Avoid eye contact

Skin Contact: Contact with the skin may result in temporary irritation. Avoid skin contact.

Inhalation: The vapour/mist may be discomforting to the upper respiratory tract and lungs. Acute effects from inhalation of high vapour concentrations may cause effects similar to that of ingestion.

Chronic Effects

No known effects.

Other Health Effects Information

Not Available.

Toxicological Information

Oral LD₅₀: >220,000 mg/kg (product, estimated)

Dermal LD₅₀: >1,500,000 mg/kg (product, estimated)

Inhalation LC₅₀: >1,000 mg/L (product, estimated)

12. ECOLOGICAL INFORMATION

Ecotoxicity

This product has low hazard potential to the environment. No specific ecological data available on this product.

Persistence/ Biodegradability: This product is biodegradable and non-persistent.

Mobility: This product is readily soluble with water and will degrade rapidly in the environment to carbon dioxide, water and oxygen

Aquatic Toxicity:

Fish toxicity LC₅₀: >1250 mg/L; product estimated

Daphnia Magna EC₅₀: >300 mg/L; product estimated

Algae EC₅₀: >300 mg/L; product estimated

Safety Data Sheet – Hawkeye Surface Sanitiser

13. DISPOSAL CONSIDERATIONS

Product Disposal

Dispose of product only by using according to label. Dilution with potable water or application outside will cause rapid degradation of the product to benign components. Do not combine with other waste solutions. If this material as supplied becomes a waste care should be taken to ensure compliance with national and local authorities. It is the responsibility of the waste generator to determine the toxicity and physical properties of the waste generated to determine the proper waste identification and disposal methods in compliance with applicable regulations. Do not dispose of via drains, natural streams or rivers.

Packaging Disposal

Triple rinse container. Empty packaging should be taken for recycling, recovery or disposal through a suitably qualified or licensed contractor. Care should be taken to ensure compliance with national and local authorities. Packaging may still contain product residue that may be harmful. Incinerate via approved incinerators or crush and bury in an approved landfill. Ensure that empty packaging is managed in accordance with and HSNO regulations.

14. TRANSPORT INFORMATION

UN No: Not a DG for transport

15. REGULATORY INFORMATION

Country/ Region: New Zealand

ACVM Approval Number: Not applicable

HSNO Approval Number: Not Available

HSNO Classifications: 6.3B Skin Irritant;

HSNO Controls:

Trigger Quantities for this Material:

- Certified Handler Test Certificate: Not Required
- Location/Transit Depot Certificate: Not Required
- Hazardous Atmosphere Zone: Not Required
- Tracking: Not required

The trigger quantities above must take into account any other hazardous substance that is present at that location. This represents a partial list of the controls for this material.

16. OTHER INFORMATION

Reasons for Issue:

New SDS.

Abbreviations:

TWA - the highest allowable exposure concentration in an eight-hour day for a five-day working week

STEL - maximum allowable exposure concentration at any time

CAS Number: Chemical Abstracts Number

EPA - Environmental Protection Agency of New Zealand

MBIE - Ministry of Business, Innovation and Employment

HSNO: Hazardous Substances and New Organisms

The information sourced for the preparation of this document was correct and complete at the time of writing to the best of the suppliers knowledge. Each user should read this MSDS and consider the information in the context of how the product will be handled and used in the workplace. The document represents the commitment to the company's responsibilities surrounding the supply of this product, undertaken in good faith. This document should be taken as a safety guide for the product and its recommended uses, but is in no way an absolute authority. Please consult the relevant legislation and regulations governing the use and storage of this type of product. For further information, please contact Key Industries Limited.
